

HCE Funding Blast Listserv: Hearing Health Foundation 2019 Grants

Hearing Health Foundation (HHF)'s 2019 Emerging Research Grants (ERG) and Ménière's Disease Grants (MRG) programs are officially open (Sept 1).

DESCRIPTION: HHF's ERG grants provide seed money to stimulate data collection that leads to a continuing, independently fundable line of research. The following topics will be considered for the 2019 ERG cycle: General Hearing Health (GHH), [Central] Auditory Processing Disorders, Hearing Loss in Children, Hyperacusis, Ménière's Disease, Ototoxic Medications, Tinnitus, and Usher Syndrome.

DESCRIPTION: HHF's Ménière's Disease Grants (MDG) program funds scientists to better our understanding of this complicated condition with an eye for better treatments and cures for those who suffer from Ménière's disease.

Areas of interest include: the mechanisms of endolymphatic hydrops; genetics of Ménière's disease; development and validation of biomarkers, including imaging and/or electrophysiologic and behavioral measures for its diagnosis and measurement of therapeutic effectiveness; animal models of Ménière's disease; and the development of novel therapeutics.

Applications close Tuesday, January 15

ERG Period of Performance: 1 year

ERG Max Funding: \$30,000

MDG Period of Performance: 2 years

MDG Max Funding: \$125,000
