HCE
HEARING CENTER
OF EXCELLENCE

SPONSORS

- Working with **internationally** recognized **KOL** from industry & academia
- Continuously building **strategic industrial** partnerships
- Speaking in **international scientific** conferences

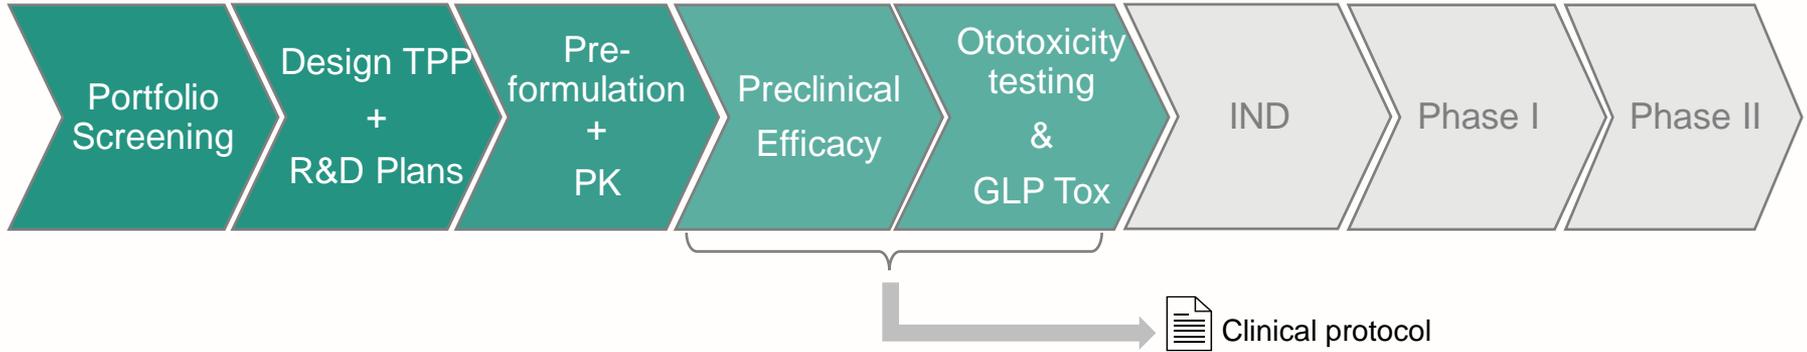

- Strongly involved in **patient associations**
- Collaborating with a **global network** of preclinical & clinical CRO partners & consultants
- Frequently **publishing** in international **peer review journals**

ARO

Think clinical development

Indication • route of administration • endpoints

In preclinical studies, select the best:

MODEL

DRUG REGIMEN

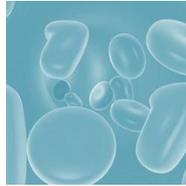

READ-OUTS

Models for auditory research & development

SCREENING PHASE

OTIC
CELL LINE

COCHLEAR
EXPLANTS

ZEBRAFISH

PK

EFFICACY

TOLERANCE

GLP-OTOTOXICITY

Mice

Rats

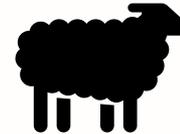

Guinea pigs

Chinchillas

Mini pigs

Sheep

RODENTS & LARGE SPECIES

Select your model to target your clinical indication

PRESBYCUSIS

- Age-related hearing loss

MICE
SAMP8

TINNITUS

- Salicylate-induced tinnitus
- Noise-induced tinnitus

RATS
Long Evans

HEARING LOSS

- Noise-induced hearing loss

RATS
Wistar
GUINEA PIGS
Hartley

OTOTOXICITY

- Drug-induced hearing loss

RATS
Wistar
MICE
CBA

GENETIC DEAFNESS

- Gene therapy

RODENTS
MINI PIGS
SHEEP

OTITIS MEDIA

- Otitis media

CHINCHILLAS
Bastard F1N1

Design efficacy study mimicking clinical situation

Differentiate POC studies from efficacy studies in terms of:

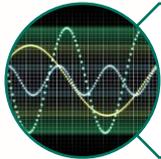

Formulation

For slow / Sustained release

Administration regimen

Preventive versus curative / regenerative treatment

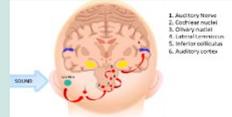

Read-outs

Translational read-outs

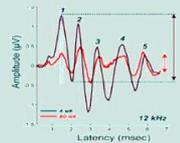

Select translational and complementary measures

Non invasive & recognized read-outs

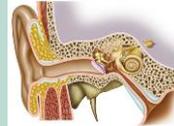

ABR (Auditory Brainstem Responses)

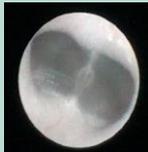

WAVE I ANALYSIS

DPOAE (Distorsion Product OtoAcoustic Emissions)

OTOSCOPY

CLINICAL SIGNS

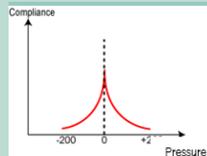

BEHAVIORAL MEASURES GPIAS

(Gap-Prepulse Inhibition of the
Acoustic Startle reflex)

TYMPANOMETRY

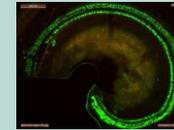

Complementary measurements

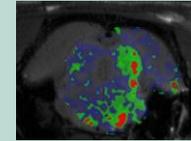

GROSS ASSESSMENT OF THE MIDDLE EAR

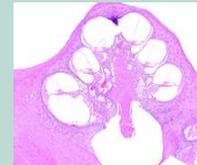

COCHLEOGRAM

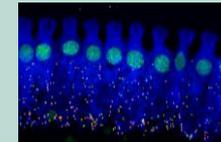

MEMRI

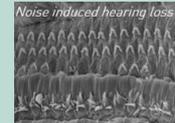

HISTOLOGY

RIBBON SYNAPSES COUNT

SEM (Scanning Electron Microscopy)

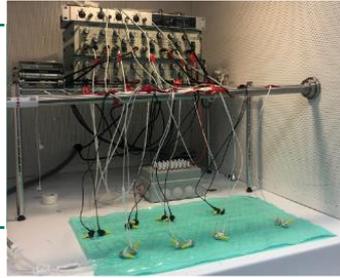

GENE & PROTEIN ARRAYS Biochemical biomarkers

Working on robust and reproducible models

High throughput measures

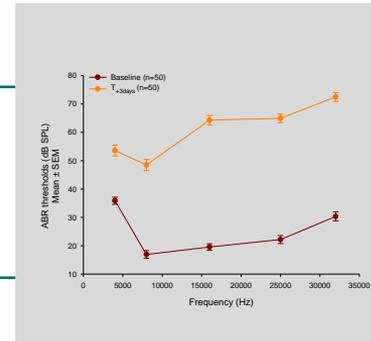

Expert team

Experiments conducted in a high-quality acoustic environment

Reproducible data over time
